

KIAN JOO CAN FACTORY BERHAD

ENERGY POLICY

KIAN JOO CAN FACTORY BERHAD, a leader in metal printing and can manufacturing, is dedicated to enhancing energy efficiency, adopting sustainable practices, and minimizing our environmental impact. In alignment with ISO 50001, we are committed to integrating climate change considerations into our energy management practices and continually improving the energy performance of our operations.

This policy establishes the framework for setting and achieving Energy Management System (EnMS) objectives and targets. It ensures compliance with legal and regulatory requirements and addresses changes in legislation or organizational structure.

COMMITMENT

-  **EnMS Development and Implementation:** Develop and implement an EnMS in accordance with ISO 50001 requirements. Allocate necessary resources and provide support to manage energy use effectively.
-  **Legal and Regulatory Compliance:** Adhere to all applicable legal and other requirements related to energy efficiency, energy use, and energy consumption.
-  **Continuous Improvement:** Continuously improve energy performance through systematic monitoring and evaluation of the EnMS. Implement corrective and preventive actions to address non-conformities and enhance energy efficiency.
-  **Energy Efficiency in Procurement:** Integrate energy efficiency considerations into the procurement process for equipment and services that impact energy use.
-  **Efficient Design and Technology:** Support and adopt practices and technologies that incorporate energy-efficient design criteria in projects affecting energy consumption.
-  **Renewable Energy and GHG Reduction:** Support and adopt practices and technologies that promote the use of renewable energy and the reduction of greenhouse gas (GHG) emissions.

Kian Joo Can Factory Berhad will continuously monitor and measure energy performance to ensure compliance with established objectives and targets. We will conduct periodic reviews of the EnMs to adapt to changes in legal requirements, organizational needs, and technological advancements, ensuring that the system remains relevant and effective in improving energy performances.

"TOGETHER WE CAN"

We are committed to empowering our employees to create a sustainable energy management culture in alignment with ISO 50001:2018 standards
